

# Manual eduroam For Microsoft Windows

1. Open your browser and enter the following URL: <https://cat.eduroam.org>
2. The welcome page will appear on your browser as shown in Figure 1. Click “download your eduroam installer”.

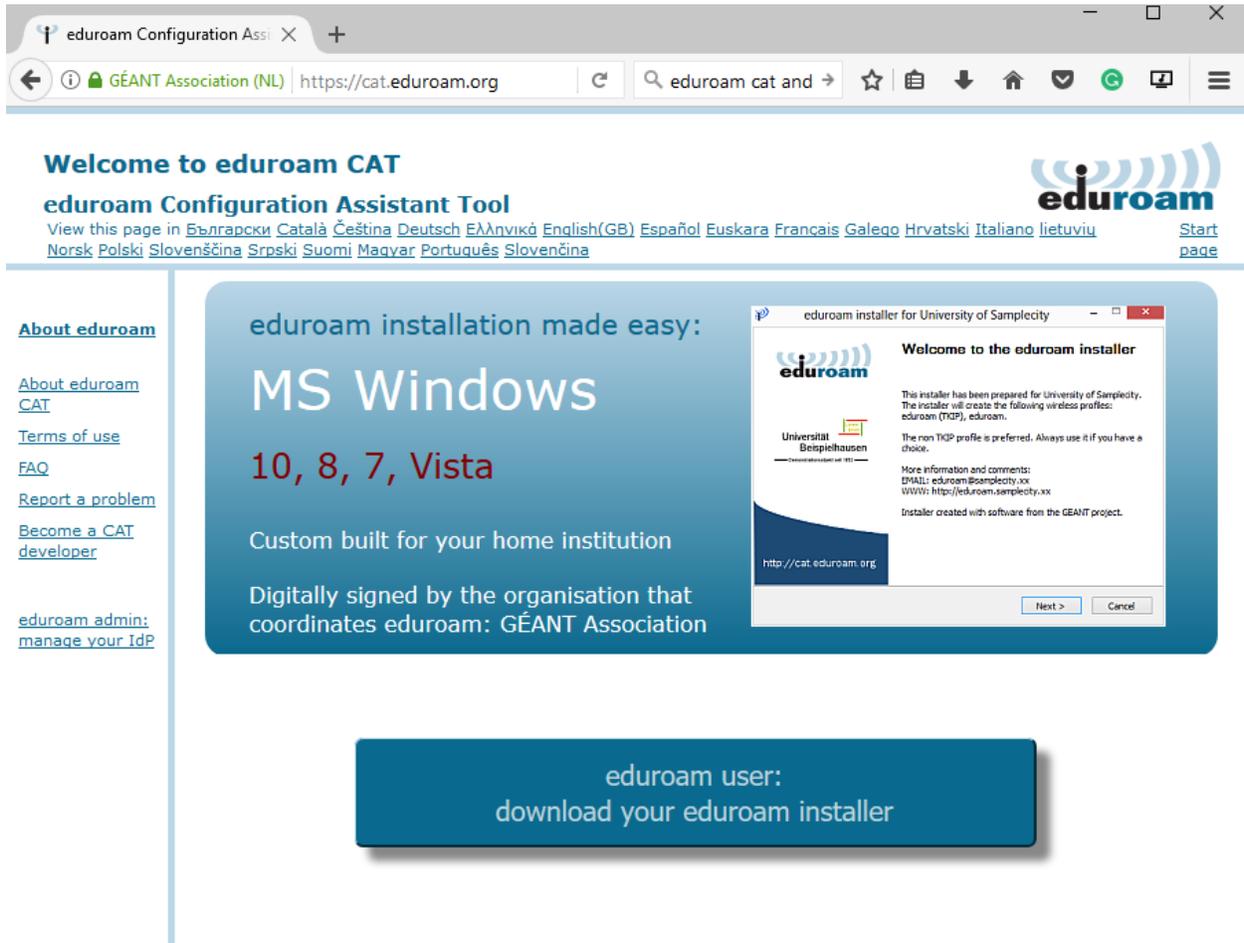

Figure 1

3. A list of institutions will be prompted to you, once you click the download link. The list of institutions is sort by the nearest institution where your computer is connected.
4. Look for your institution. If your institution is not on the list, you might want to use the search text box to find your institution. For Warga USM, please look for Universiti Sains Malaysia. Click the link button to proceed.

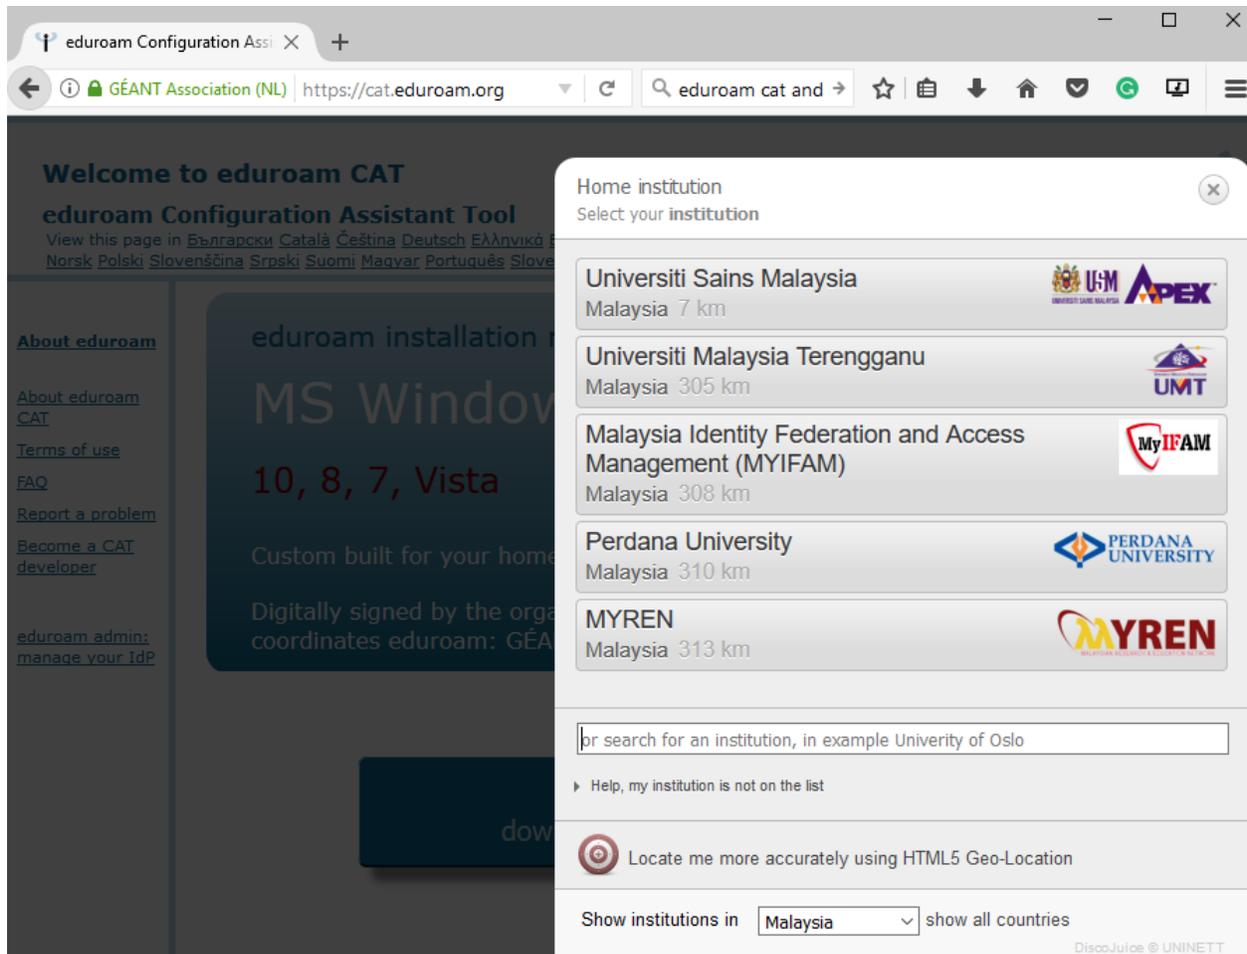

Figure 2

5. After clicking the button, you will be redirected to the download page base on your selected institution. This web will suggest the best configuration base on your operating system.

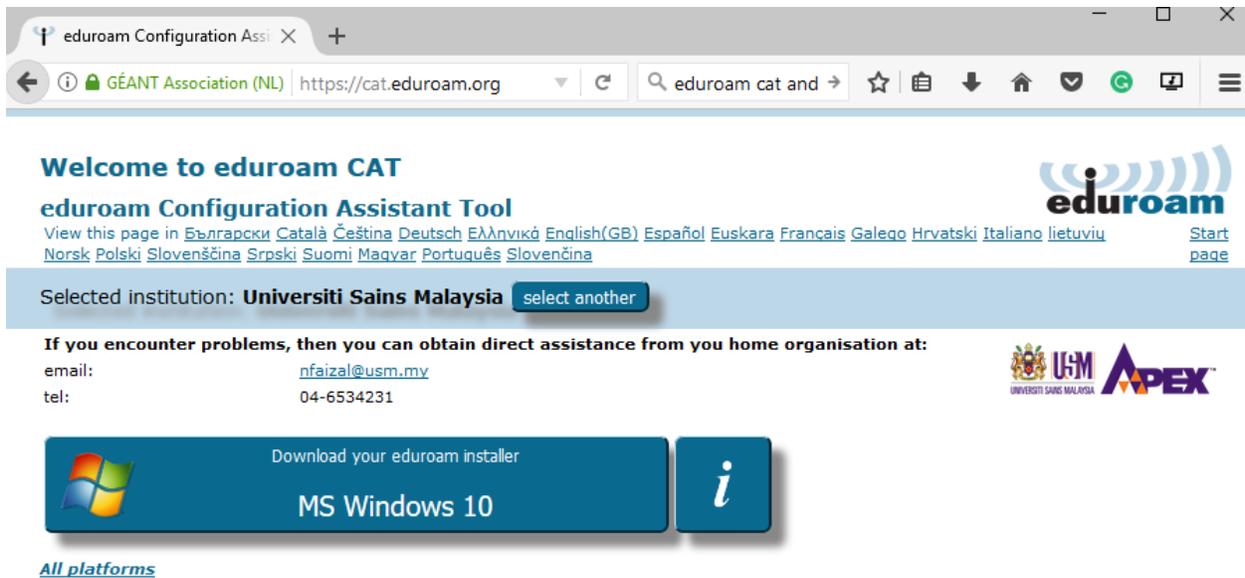

Figure 3

6. Click Download you eduroam installer. For this case, the web detects operating system running on Windows 10. You will be prompted to download a file as shown in Figure 5. Save and run the downloaded file.

Selected institution: **Universiti Sains Malaysia** [select another](#)

**If you encounter problems, then you can obtain direct assistance from you home organisation at:**  
 email: [nfaizal@usm.my](mailto:nfaizal@usm.my)  
 tel: 04-6534231

**Welcome aboard the eduroam user community!**

Your download will start shortly. In case of problems with the automatic download please use this direct [link](#).

Dear user from Universiti Sains Malaysia,

we would like to warmly welcome you among the several million users of eduroam! From now on, you will be able to use internet access resources on thousands of universities, research centres and other places all over the globe. All of this completely free of charge!

Now that you have downloaded and installed a client configurator, all you need to do is find an eduroam hotspot in your vicinity and enter your user credentials (this is our fancy name for 'username and password' or 'personal certificate') - and be online!

Should you have any problems using this service, please always contact the helpdesk of Universiti Sains Malaysia. They will diagnose the problem and help you out. You can reach them via the means shown above.
